White Mountain Hearth – The Pinnacle of Efficiency

DVX42DP Direct-Vent Fireplace with Braided Arch Decorative Front in Matte Black, Banded Brick Liner, White Profile Mantelshelf, and custom tile surround.

White Mountain Hearth

Our Studio Series Fireplaces create an attractive, clean-face look but deliver the convenience and efficiency of a modern, direct-vent heat source. These exceptional fireplace systems are rated at up to 82-percent AFUE and up to 37,500 Btu input.

Choose a Fireplace

Studio Series Fireplaces are available in Premium Models – featuring tempered glass, automatic blower, and a four-piece log set mounted on a Slope Glaze Burner – and in Luxury Models – featuring ceramic glass (for better heat transfer), dimmer-controlled interior lighting, automatic blower, and a 13-piece log set atop the larger Slope Glaze Excess Burner.

Within the Premium and Luxury lines, you choose the technology: remote-ready Millivolt, Intermittent Pilot (which eliminates the standing pilot for even greater efficiency, but requires 110 V to operate), or RF (which includes a thermostat remote that automatically adjusts flame height and blower speed to maintain your ideal temperature setting – also requires 110 V.)

We offer both Premium and Luxury fireplaces in 36-inch and 42-inch and in LP and Natural.

Fireplace	Btu (LP/Nat)	Available Liners	Venting
Premium 36	27,000/25,000	Aged Brick, Herringbone, Stacked Limestone	4 x 6 5/8 (LP: top-vent only)
Premium 42	28,000/28,000	Aged Brick, Herringbone, Stacked Limestone	5 x 8
Luxury 36	30,000/33,000	Banded Brick, Stacked Limestone	4 x 6 5/8 (top-vent only)
Luxury 42	35,000/37,500	Banded Brick, Stacked Limestone	5 x 8 (top-vent only)

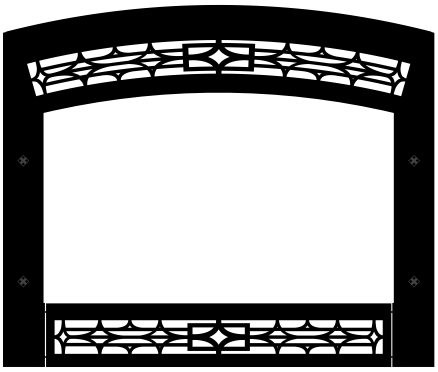
Choose a Clean Face Decorative Front

Complete your Studio Series Fireplace with a Clean Face Decorative Front, in one of three distinct designs – Tiffany Arch, Braided Arch, and the rectangular Arts and Crafts.

Constructed from 12-gauge steel and finished with durable heat-resistant coatings these attractive Decorative Fronts will provide a lifetime of enjoyment.

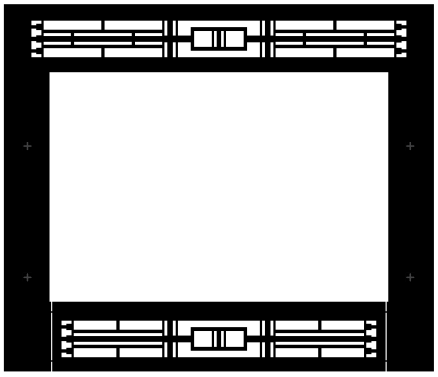
The optional Marquis Arch Doors and Arts & Crafts Rectangle Doors add depth and drama. Made from 11-gauge steel, these operable doors are fitted with screens.

Clean Face Options - include appliqués



Tiffany Arch

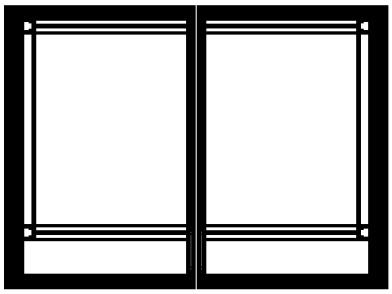
Braided Arch



Arts & Crafts

Decorative Doors - include handles and hinges

Marquis Arch Doors
(for use with Braided and Tiffany style faces)

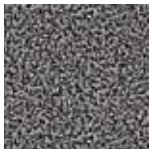


Arts & Crafts Rectangle Doors
(available for Arts & Crafts model only)

Finish Options

- available for all clean facing accessories and doors

Matte Black



Hammered Pewter

Copper Metallic

Studio Series Clean Face Fronts come with appliqués. Remove to apply optional doors.

Choose a Fireplace Liner

No fireplace is complete without a liner. Available for Premium and Luxury fireplaces, our ultra-realistic Stacked Limestone design features irregular-shaped stones that recreate the look and feel of a rustic cabin fireplace.

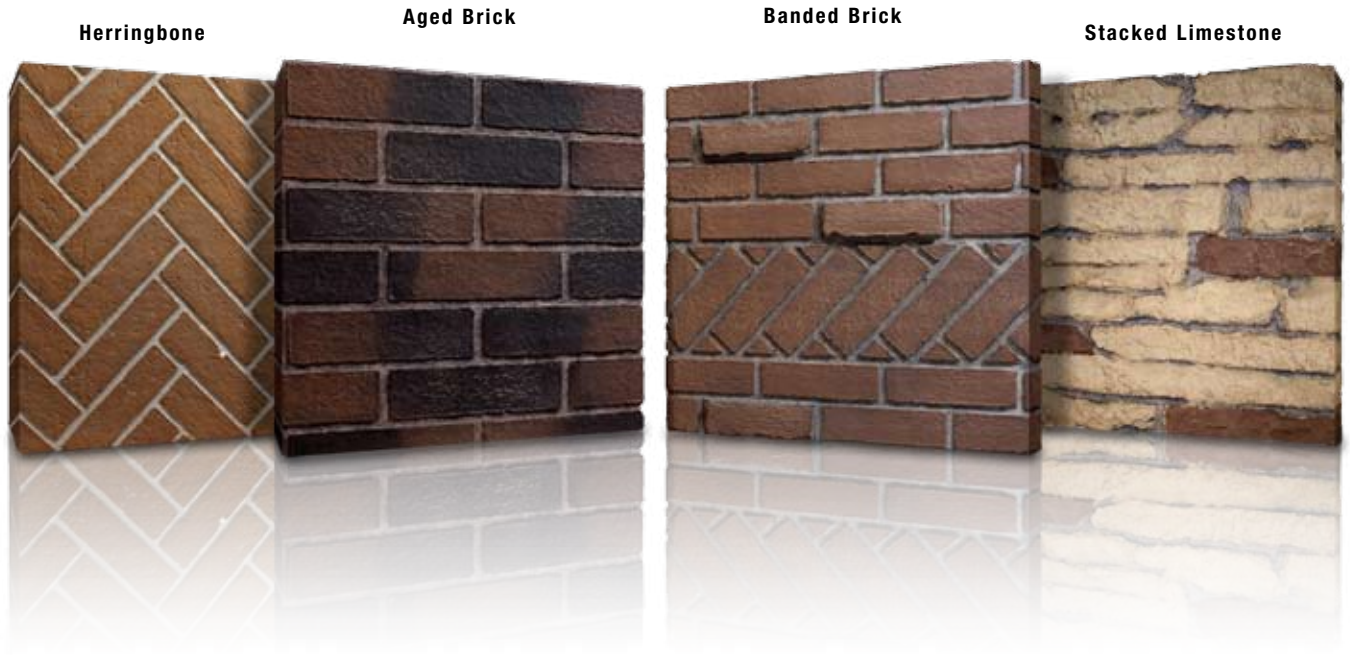
Our Herringbone liners (for Premium models only) feature burnt umber bricks in a herringbone pattern. The look is both contemporary and classic.

DVX42DP Direct-Vent Fireplace with Banded Brick Liner

Our Aged Brick features brown bricks in a running bond course with charcoal mortar, and smoke accents.

Our Banded Brick liners (for Luxury models only) feature dark “creamed coffee” bricks in a running bond course, plus an accent band of diagonal bricks.

All of our liners are made from ceramic fiber and hand painted for rich natural coloring. Color may vary.



DVP36DP Direct-Vent Fireplace with Arts and Crafts Decorative Front in Copper Metallic, Stacked Limestone Brick Liner, Profile Mantelshelf in custom Cherry finish, and custom tile surround.

Choose a Control System

Studio Direct Ignition (DI) Systems

Direct-Ignition Systems, available in Deluxe, Premium, and Luxury models, eliminate the pilot light for greater energy efficiency. These systems use 110V AC to generate a spark to directly ignite the burner each time it comes on. These systems operate with a FWS wall switch or with the FREC electric remote control system.

Studio Intermittent Pilot (IP) Systems

Intermittent Pilot Systems, available in Premium and Luxury models, eliminate the continuous standing pilot light. These systems require household current and use a 24-volt transformer to generate a spark, which ignites the pilot only when needed.

Studio RF Systems - Variable Flame & Blower Speed

Studio Series Premium and Luxury RF Systems include a thermostat remote and special integrated remote that controls ignition and varies the flame height and blower speed to maintain your pre-set room temperature. On Luxury models only, the remote control also operates the fireplace lighting dimmer.

While the technology is sophisticated, the remote control is easy to use – with a large digital readout and well-marked buttons. Unlike a TV remote, the RF remote does not need to point at the fireplace to work, so it can be placed anywhere in the room. Best of all, RF models include a battery back-up to continue to provide heat when electric power fails.
