

THE PRADO SERIES

Vented Gas Log Systems

Arcadia

Superior design, performance & features together with true, wood-burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

Innovation on fire

It isn't often that a product offers design, features, performance and quality at a level to lead an entire industry in virtually every category. The Prado Series™ from Design Dynamics™ presents this rare opportunity for your home with the beautiful new Arcadia vented gas log system.

Dramatic Realism

The Arcadia's beautifully detailed, rustic wood stack is painstakingly recreated from an actual wood fire complete with logs, coals and embers. Then they're hand detailed in natural wood tones throughout the deep bark patterns, split wood highlights, and even the smoked, charred features, like a real, active fire.

Outstanding Performance

But this is more than just another pretty flame. The Arcadia's soot-free performance rivals that of most vent free heaters. And a glowing flame presentation like this with such low emissions can only be achieved through superior design. The Arcadia's high efficiency burner design maximizes the glowing and heating properties of the ceramic material, yet still achieves the cleanest, most complete burn in the industry!

Absolute Safety

Design Dynamics goes above and beyond when it comes to safety of our products. In addition to industry-leading, clean flame combustion technology, the Arcadia includes an easy access, remote-ready millivolt gas safety control with matchless, piezo ignition. The control and gas train are 100% factory assembled and tested.

Instant Enjoyment & Convenience

The Arcadia's unitized, fully assembled design also makes installation a breeze. Just complete the gas connection using the shut-off valve and stainless flex connector provided. And, unlike other manufacturers, Design Dynamics' products don't require any break in or "burn off" period, so you can enjoy your new gas logs instantly.

Standard Features

- Realistic ceramic fiber 6-log set is unitized to assure safety, performance, and ease of installation.
- Single flame, high efficiency burner creates active, colorful flame presentation and plenty of glowing coals.
- Decorative control cover, log scraps, and lava floor cinders complete the custom hearth presentation.
- Fully assembled, easy access gas train assembly with adjustable, remote-ready millivolt gas control; front mounted for easy access and includes matchless, piezo igniter.
- Design certified decorative gas appliance (ANSI Z21.60.A-2000).

Solid, unitized log set is intricately detailed

Gas train/control assembly is fully assembled and factory tested
