FIREPLACES
FOR BUILDERS
Fmi

Stunning Looks, Outstanding Performance

Homeowners love big, traditional masonry fireplaces. They also love the comfortable, efficient zone heat that vent free appliances provide them. The new Bavarian Mosaic Masonry™ vent free fireplace offers all these benefits and more... with a host of beautiful new features homeowners will love!

Homeowner Highlights:

- **Authentic Masonry Design**— These unique fireplaces feature enormous firebox dimensions with a smooth style face. When finished flush to the opening, the absence of any visible sheet metal creates the foundation for a true masonry hearth presentation.
- **Masonry Firebrick Liner**—Mosaic Masonry™ firebrick lining system makes Fmi's Grand Masters Series the only real masonry, factory built and lab certified fireplaces! The beautiful firebrick kit is indistinguishable from site-built masonry and is available in both traditional Warm Red and new Ivory.

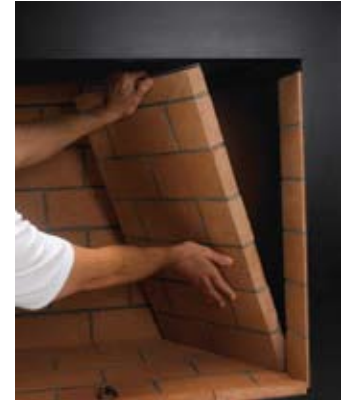

Efficiency and performance—Bavarians come standard fully insulated. And at 99%, vent free heating is the most efficient heat source available.

Builder Benefits:

- **Reliability and Versatility**— Despite the authentic, site-built masonry appearance; The Bavarian is actually an ANSI Z21.91 "zero clearance" certified fireplace. This means flexible installation options and guaranteed performance.
- **Masonry Firebrick Liner**— The patented Mosaic Masonry™ firebrick kit is a complete masonry lining system of pre-engineered, steel reinforced, kiln fired clay firebrick walls that install as easily as typical factory-built concrete liners, but finish just like site-built masonry. They're even factory grouted to minimize site installation time.
- **Economical and Versatile**—When you eliminate all that chase construction, installation costs come way down. And without any venting to worry about, they're versatile, enough to be installed just about anywhere.

Masonry Bavarians are available in 36", 42" and 50" wide openings with Full 30" clear opening height.

Mosaic Masonry™ made simple. All new pre-engineered firebrick system features steel reinforced, factory-built and grouted masonry walls that easily slip into place and securely fasten to the steel fireplace chassis.

Bavarian Product Offering Summary
