Beautiful Blend
of Value
and Quality

Stylish extras for homeowners...Better value for builders

FIREPLACES
FOR BUILDERS
Fmi

Outstanding Value & Performance

Homeowners love efficiency. And there is no greater energy or space efficient heating source than a vent free fireplace and gas log heater. Fmi's new Cape Cod vent free fireplace offers efficiency and more with a large, superior quality fireplace at an unbeatable value... and with a host of beautiful new options and features homeowners will love!

Homeowner Highlights:

- **Unparalleled Value**— The new Cape Cod fireplace features a sleek design and heavy steel construction with tough, textured powder coated finish. True 36" and 42" fireplace openings accept the greatest variety of vent free gas logs, and we've even included operable masonry mesh screens for a true wood burning look and feel.
- **Variety of Choices**— Available in both 36" and 42" sizes with either black painted, or factory installed refractory brick-lined interiors. Clean faced units allow you to add your choice of surround material right up to the fireplace opening, while louvered models circulate hot convection air.
- **Efficiency and performance**— At 99%, vent free heating with a Cape Cod fireplace is the most efficient heat source available.
- **Attractive Accessories**— Available accessories include realistic ceramic interior brick lining kits and a variety of gas log heaters. Outside air kits are also available for areas where they're required.

Builder Benefits:

- **Secure, Straight Installation**— We've added solid, continuous nailing flanges and drywall stops for a perfect installation every time.
- **Economical and Versatile**— When you eliminate all that chase construction, installation costs come way down. And without any venting to worry about, they're versatile, enough to be installed just about anywhere.
- **Value**— The Cape Cod offers excellent quality and an extremely economical price.

The BV36B is a 36" Smooth-faced Model with Concrete Refractory Brick Liner.

The BV42L offers Louver-faced Feature for Warm Air Circulation
