Wood Burning Fireplace

Superior design, performance & features together with true, wood burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

# INNOVATION ON FIRE

It isn't often a product line offers looks, features, performance and quality at a level to lead an entire industry in virtually every category. Design Dynamics™ presents the new Saber Wood Burning Fireplace; The most traditionally styled, certified fireplace in the business featuring patent pending technology and award-winning design innovation.

## Dramatic Beauty

When it comes to authentic, traditional masonry, no certified product can touch the Saber line of woodburning fireplaces. They feature large, unobstructed openings for a real site-built masonry appearance. Each of the three available sizes features a 30" tall opening with no visible sheetmetal to spoil the view of its exceptional firebrick interior.

The Saber's patented Mosaic Masonry™ firebrick kit is a complete, easy to install masonry system featuring individual half-split bricks in a variety of rich patterns and colors. The kit includes factory installed templates, precut and labeled bricks, and even a bag of hi-temp mortar to grout the finished fireplace.

## Absolute Quality

On top of its authentic, site-built masonry appearance, the Saber is a UL 127 lab tested and certified "zero clearance" fireplace utilizing a solid, steel chassis. This means flexible and reliable installation options, and guaranteed quality and performance. It is fully insulated and features a large, high flow dome for optimum combustion air movement. Venting is 12" (i.d.) Class A rated chimney.

## Convenient & Solid Installation

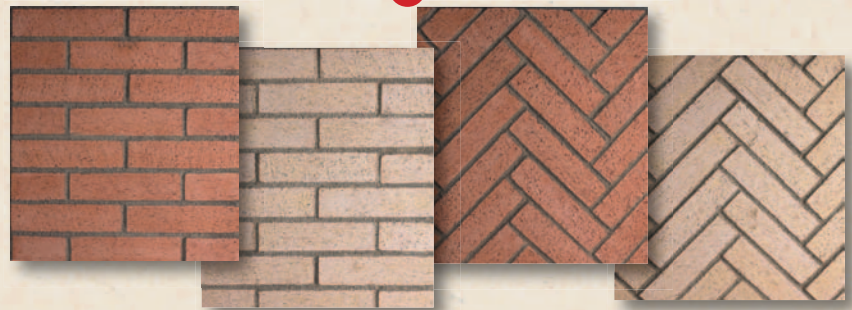

The Saber's steel chassis includes heavy, continuous nailing flanges and drywall stops around the face frame for solid and convenient installation, and includes a tough, textured powder coat finish. We've included gas knockout locations on both sides for convenient addition of a log-lighter or gas log set.

The Saber is available in 36", 42" & 50" opening widths, each 30" high with no visible sheet metal.

## Standard Features:

- 1 30" Opening Height (all sizes).
- 2 Mosaic Masonry™ Firebrick Lining System.
- 3 Hand-forged, Solid Steel Log Grate w/ Andirons.
- 4 Left & Right Side Gas Line Knockouts
- 5 Continuous Nailing Flanges and Drywall Stops.
- 6 Steel Mesh Masonry Spark Screens
- 7 Design Certification (UL 127)
- 8 Full Insulation.

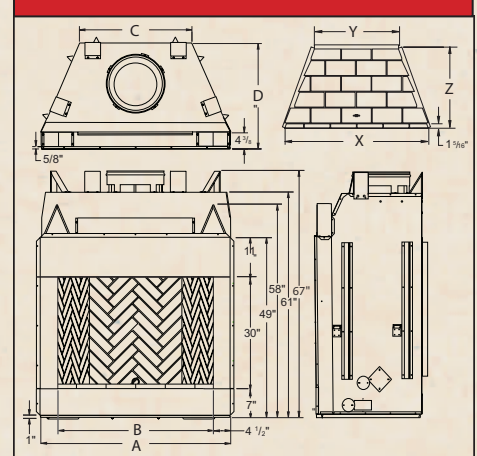

The patent pending Mosaic Masonry™ real firebrick lining kits are available in Warm Red and Ivory. The installed system is indistinguishable from site-built masonry.
