

SENTINEL

Direct Vent Gas Fireplace

Superior design, performance & features together with true, wood burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

INNOVATION ON FIRE

It isn't often a product line offers looks, features, performance and quality at a level to lead an entire industry in virtually every category. Design Dynamics™ presents the new Sentinel direct vent gas fireplace; A traditional masonry styled fireplace featuring the latest technology and unique design innovation.

The clean faced Sentinel is available in tall, unobstructed 36" & 42" opening widths.

Standard Features:

- 1 Premier, fully unitized log stack
- 2 Concealed Electronic Ignition and Control System
- 3 Louverless, Masonry Design
- 4 Full Refractory Brick Lining
- 5 Functional Mesh Safety Pull Screens
- 6 Continuous Nailing Flanges and Drywall Stops.
- 8 Design Certification (ANSI Z21.50)
- 9 Hand Held Remote Control.

Dramatic Beauty

Direct vent gas fireplaces are a great hearth innovation. Their indoor air quality, efficiency and installation advantages have solidly established them as today's leading fireplace category. However with all their exposed louvers and sheet metal, most direct vents look more like a microwave oven than a fireplace.

The clean faced design of our new Sentinel is a clear departure from this trend. Every effort was exhausted to maximize the things you want to see, and to get rid of the things you don't. The combination ceramic ember bed/ steel tube burner system creates lively, colorful flame patterns and a deep smoldering glow only a real wood fire could match. The dramatic flame picture is enhanced by the industry's finest refractory brick liners which are individually cast and hand finished for incomparable masonry realism.

Absolute Quality & Features

The Sentinel features a fully electronic ignition and control system with battery back-up for safe, reliable duty even in power outages. The system can be operated from a wall switch or the convenient remote control included.

Convenient & Solid Installation

The top, direct vent configuration of the Sentinel provides a wide variety of convenient venting options using our 5" / 8" coaxial chimney system. The solid steel chassis face includes heavy, continuous nailing flanges and drywall stops around the face frame for solid installation, and includes a tough, textured powder coat finish.

The Sentinel's perimer brick surround kit (PBS-36/42) is a "must have" accessory.

The Industries finest refractory brick lining kits are hand-detailed in a custom two-tone pattern, and available in running bond and herringbone patterns.

The Sentinel's premium log stack and burner with concealed ignition and control system produce natural flame patterns and plenty of radiant glow.

	36"	42"
A	41	48 1/4
B	35	42
C	29	34 3/4
