

THE PRADO SERIES

Vented Gas Log Systems

Valhalla

Superior design, performance & features together with true, wood-burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

Innovation on fire

It isn't often that a product offers design, features, performance and quality at a level to lead an entire industry in virtually every category. The Prado Series™ from Design Dynamics™ presents this rare opportunity for your home with the beautiful new Valhalla vented gas log system.

Dramatic Realism

The Valhalla's intricately detailed, generous 9-log stack is painstakingly recreated from an actual wood fire complete with logs, coals and embers. Then they're hand finished in natural wood tones throughout the deep bark patterns, split wood highlights, and even the smoked, charred features, like a real, active fire.

Outstanding Performance

But this is more than just another pretty flame. The Valhalla's soot-free performance rivals that of most vent free heaters. And a glowing flame presentation like this with such low emissions can only be achieved through superior design. The Valhalla's high efficiency burner design maximizes the glowing and heating properties of the ceramic material, yet still achieves the cleanest, most complete burn in the industry!

Absolute Safety & Convenience

Design Dynamics goes above and beyond when it comes to safety of our products. In addition to industry-leading, clean flame combustion technology, the Valhalla includes an easy access, millivolt gas safety valve with matchless, piezo ignition and the convenience of hand-held remote control. The control and gas train are 100% factory assembled and tested.

18" Valhalla

Instant Enjoyment

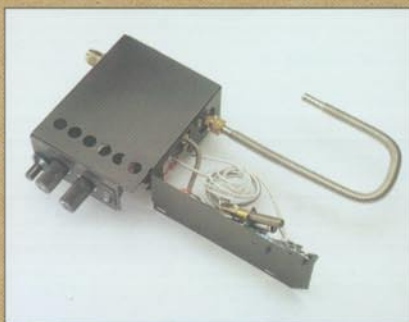

The Valhalla's unitized, fully assembled design also makes installation a breeze. Just complete the gas connection using the shut-off valve and stainless flex connector provided. And, unlike other manufacturers, Design Dynamics' products don't require any break in or "burn off" period, so you can enjoy your new gas logs instantly.

Standard Features

- Realistic ceramic fiber 9-log set is unitized to assure safety, performance, and ease of installation.
- Single flame, high efficiency burner creates active, colorful flame presentation and plenty of glowing coals.
- Hand-held remote control.
- Decorative control cover, log scraps, and lava floor cinders complete the custom hearth presentation.
- Fully assembled millivolt gas train assembly; front mounted for easy access and includes matchless, piezo igniter.
- Design certified decorative gas appliance (ANSI Z21.60.A-2000).
