

Stratos Direct-Vent Fireplace

WELCOME HOME TO WARMTH

# Direct Vent

# Stratos Direct Vent Gas Fireplace

Vantage Hearth's Stratos is a clear departure from typical direct vent gas fireplaces. Although most direct vents include an excess of visible sheet metal and louvers, every effort was exhausted to make the Stratos look like a real wood burning fireplace.

The combination ceramic ember bed/ steel tube burner system creates lively, colorful flame patterns and a deep smoldering glow only a real wood fire could match. The dramatic flame picture is enhanced by the industry's finest refractory brick liners for incomparable masonry realism.

## Quality & Features

The Stratos features a fully electronic ignition and control system with battery back-up for safe reliability, even in power outages. The system can be operated from a wall switch or the convenient remote control included.

## Convenient & Solid Installation

The top, direct vent configuration of the Stratos provides a wide variety of convenient venting options using our 5" / 8" coaxial chimney system. The solid steel chassis face includes heavy, continuous nailing flanges and drywall stops around the face frame for solid installation, and includes a tough, textured powder coat finish.

The clean-faced Stratos is available in tall, unobstructed 36" & 42" opening widths.
