

THE ARROYO SERIES

Vent Free Gas Log Heaters

Yukon

Superior design, performance & features together with true, wood-burning realism hallmark the most innovative, most advanced hearth products ever available. Only from Design Dynamics.

Innovation on fire

It isn't often that a product offers design, features, performance and quality at a level to lead an entire industry in virtually every category. The Arroyo Series™ from Design Dynamics™ presents this rare opportunity for your home with the beautiful new Yukon vent free gas log heater.

Dramatic Realism

The Yukon's beautifully detailed, rustic wood stack is painstakingly recreated from an actual wood fire complete with logs, coals and embers. Then they're hand detailed in natural wood tones throughout the deep bark patterns, split wood highlights, and even the smoked, charred features, like a real, active fire.

Outstanding Performance

But a glowing flame presentation like this in a vent free heater can only be achieved through superior design and nearly perfect fuel combustion and efficiency. The Yukon's high efficiency burner design maximizes the glowing and heating properties of the ceramic material, yet still achieves the cleanest, most complete burn in the industry!

Absolute Safety

You can rest assured that your new Yukon is the safest vent free gas log heater available. In addition to standard oxygen depletion safety controls, and industry-leading, clean flame combustion technology, the entire log set and ember bed is unitized in a pre-assembled arrangement. This feature assures maximum performance and eliminates the possibility of log misplacement or movement, and potential degradation of indoor air quality. The control and gas train are 100% factory assembled and tested.

18" Yukon

Instant Enjoyment

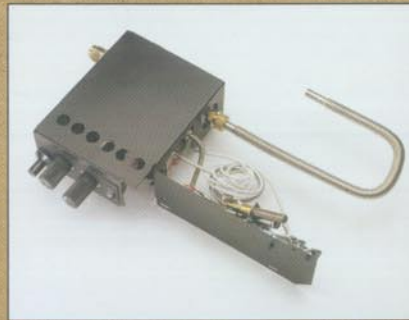

The Yukon's unitized, fully assembled design also makes installation a breeze. Just complete the gas connection using the shut-off valve and stainless flex connector provided. And, unlike other manufacturers, Design Dynamics' logs don't require any break in or "burn off" period, so you can enjoy your new heater instantly!

Standard Features

- Realistic ceramic fiber 6-log set and ember bed is unitized to assure safety, performance, and ease of installation.
- Single flame, high efficiency burner creates active, colorful flame presentation and plenty of glowing coals.
- Decorative control cover, log scraps, and lava floor cinders complete the custom hearth presentation.
- 99% heating efficiency.
- Fully assembled, easy access gas train assembly with adjustable, remote-ready millivolt gas control; front mounted for easy access and includes matchless, piezo igniter.
- Dual certification for use as a vent free gas heater (ANSI Z21.11.2) or as a vented, decorative gas appliance (ANSI Z21.60.A-2000).

Solid, unitized log set is intricately detailed

Gas train/control assembly is fully assembled and factory tested

Standard feature components

Accessories

- Hand held remote controls (Standard or thermostatic)
- Damper clamp (for use as vented decorative gas appliance)
